**Teleflex Power Systems Drives Significant Growth in Select Fuel Management and Emissions Sensitive Systems and Applications**

*Power Systems Has Launched Its Internet Site [www.teleflexpower.com](http://www.teleflexpower.com)*

Richmond, BC, Canada - Teleflex Power Systems, a recognized global leader in heavy-duty truck auxiliary power systems, advanced coolant heaters, and alternative fuel components and systems, has announced that 2006 is a pivotal year in driving for growth and establishing the company as best-in-class for product value, and customer support and satisfaction.

Teleflex Power Systems possesses unique technologies and solutions that enable enhanced fuel and power management in select mobile applications. The company's products coupled with their ability to often reduce emissions create very exciting opportunities for growth and meeting today's urgent environmental concerns. "We have key products and capabilities to help our customers tackle the ever increasing cost of fuel while also addressing the challenges of environmental emissions," said Kam Mofid, vice president and general manager of Teleflex Power Systems. "We are committed to being the supplier of choice for our customers by providing the greatest overall value to meet their requirements. In fact, we have been pioneers and innovation leaders in the key markets we operate in such as auxiliary power units and LPG/CNG alternative fuel systems."

Teleflex Power Systems has launched its new website showcasing the organization's depth and breadth of its products and capabilities to address variety of fuel and power management and emission challenges. Further information can be obtained by visiting our newly developed web site at [www.teleflexpower.com](http://www.teleflexpower.com)
